PROFESSIONAL SUMMARY

Full Stack Software Engineer with 4+ years of experience building scalable, high-performance SaaS applications using the **MERN stack (MongoDB, Express.js, React.js, Node.js)** and **AWS**. Specialized in document automation, rich text editors, PDF generation, and secure cloud file storage. Proven record of replacing paid third-party tools (Froala, Filestack, Docxtemplater) with in-house engines, cutting recurring costs and improving scalability. Experienced in REST API design, microservices, system integration, and leading cross-functional teams in Agile environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C#, Python, HTML5, CSS3

Frontend: React.js, Tiptap, ProseMirror, Tailwind CSS, Responsive UI, Component Architecture, State Management

Backend: Node.js, Express.js, RESTful APIs, Microservices, JWT Authentication, Middleware, Webhooks

Database & Cloud: MongoDB, AWS S3 (Server-Side / Client-Side Encryption), AWS SDK

Document Processing: LibreOffice (Headless), Mammoth, Word-to-PDF Conversion, Document Templating, Rich Text Editors

Tools & Practices: Git, GitHub, Postman, VS Code, Agile / Scrum, Code Reviews, SDLC

PROFESSIONAL EXPERIENCE

Software Developer (Full Stack - MERN)

01/2023 - Present

SPM Global Technologies | *Bengaluru, India*

- **Custom WYSIWYG Rich Text Editor:** Designed and built a high-performance rich text editor using **React.js, Tiptap and ProseMirror**, handling advanced DOM manipulation and isolated multi-editor state; replaced the paid **Froala** subscription.
- **PDF Conversion Engine:** Independently architected a custom **LibreOffice (headless)** module for enterprise-grade Word-to-PDF conversion with dynamic Table of Contents support; replaced the paid **Filestack** API.
- **Document Templating Microservice:** Led a team to build a **Python**-based document generation microservice handling complex dynamic data injection; replaced **Docxtemplater**.
- **AWS S3 Cloud Storage Migration:** Migrated enterprise file management to **AWS S3** with server-side and client-side encryption using the AWS SDK, improving security and reliability of document storage.
- **SolidWorks Desktop Integration (C#):** Led a cross-functional team to build a C# connector linking the MERN web platform with SolidWorks, enabling real-time sync of configurations, properties, BOMs, balloons and mate states (suppress/unsuppress) for enterprise client **Bajaj Indef** (Design Automation).
- **Performance & Scale:** Optimized backend document generation workflows to handle heavy enterprise loads, reducing server response times and failure rates.
- **Client Delivery:** Delivered a high-priority enterprise client requirement under an aggressive deadline with full customer sign-off.

Frontend Developer

03/2022 - 10/2022

Bristlecone India Limited | *Bengaluru, India*

- Developed and optimized **RESTful APIs** with **Node.js, Express.js and MongoDB**, including backend validation, error handling and secure **JWT** authentication middleware.
- Refactored **React.js** component architecture, implemented efficient state management and built responsive UIs with **Tailwind CSS** and modern JavaScript (ES6+).
- Integrated third-party APIs and services, handling asynchronous data pipelines, webhook event processing and external data synchronization.
- Worked in **Agile** sprints with sprint planning, code reviews and Git-based workflows, turning product requirements into clean, maintainable code.

KEY ACHIEVEMENTS

- Eliminated three recurring third-party subscriptions (**Froala, Filestack, Docxtemplater**) by building proprietary in-house modules, significantly reducing annual operational cost.
- Led cross-functional teams on two major initiatives: the document templating microservice and the C# SolidWorks connector.

EDUCATION & LANGUAGES

Bachelor of Engineering (B.E.) - P.E.S. Institute of Technology and Management | Visvesvaraya Technological University (VTU)

Languages: English (Professional), Kannada (Professional), Hindi (Intermediate)
